Create a home that's

Tidy.   Not techy.

Bring together TV, audio & automation for smarter living.

MHUB with uControl is the smart central media hub that unifies home entertainment, maximises content, reduces clutter, and simplifies control of lighting and shading throughout the home.

Serene smart spaces.

Design spaces that feel calm and considered, featuring stunning technology that blends seamlessly with your home's design and offers intuitive control the whole family can use every day.

Tidy rooms.

MHUB is a centralised system, designed to be out-of-sight. Connect all the TV clutter (set top boxes, streamers or CCTV) to our system - leaving only a TV or speakers in every room, creating more premium and peaceful spaces to live in.

One cable.

Using standard Cat 6 cable, connect MHUB to every room in your home to distribute TV & audio and to enable control in that space.

Unified control.

From the remote in your hand to the app on your phone or the smartwatch on your wrist, uControl fits around you - offering multiple ways to easily control everything, however and wherever you need it.

Works with leading brands.

"We designed the uControl Remote to feel right the first time you hold it. Every button, every curve - it's all there to serve the way you live."
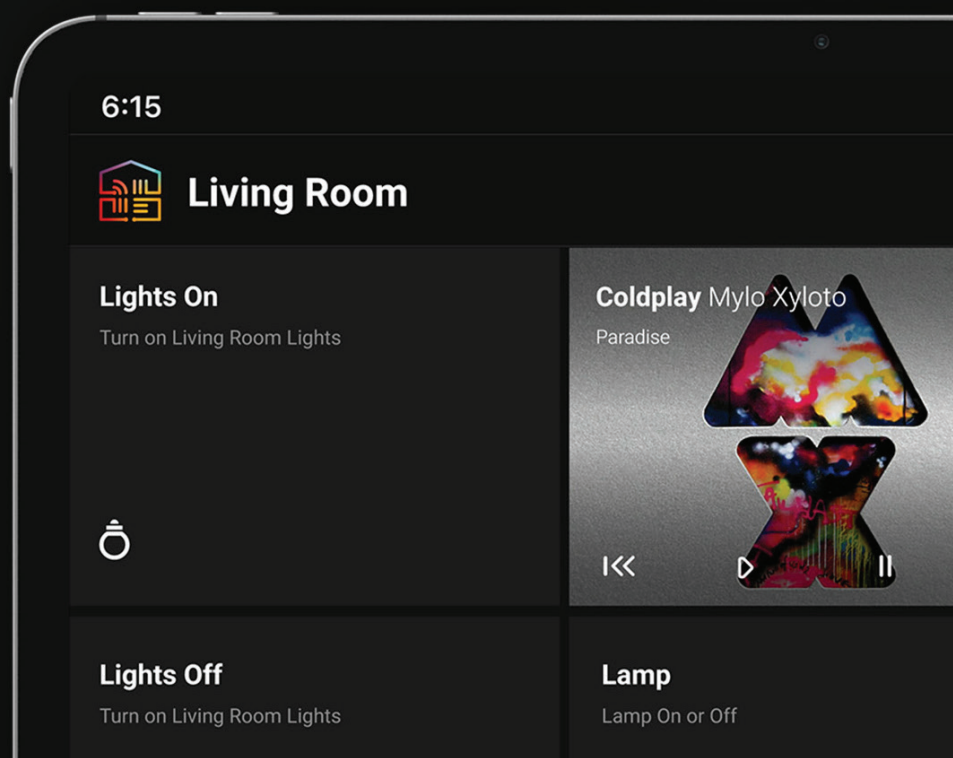

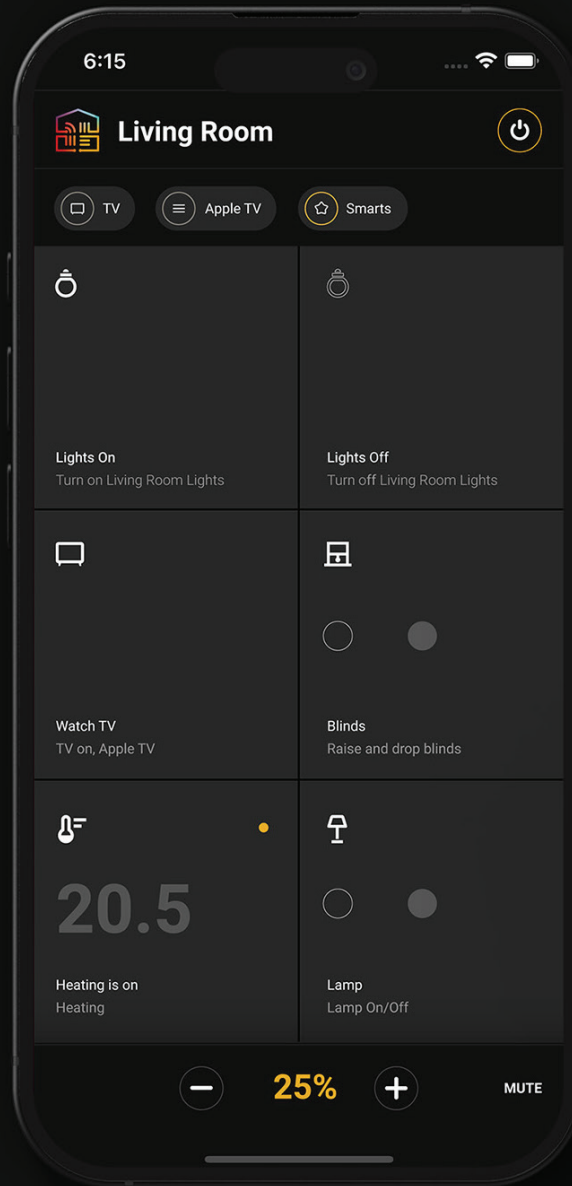

Dillan Pattni - Lead Designer.

A complete control centre for you home.

uControl brings together TVs, audio systems, smart lighting, shading, and more. Replacing complexity with simplicity by giving you powerful control through a beautifully designed app, premium remote, wall keypads, and smart automation.

Local control, always on.
uControl runs everything locally - so it's fast, private, and doesn't rely on the cloud. Even if the internet goes down, your control doesn't.
