

Manage multiple TVs and audio zones with ease.

MHUB S - One system to run every screen and every speaker.
The all-in-one platform for venues that need smart, dependable AV.
Fast to deploy, easy to use, and designed to work without fuss.

Up to 160 displays

Simple installation

Superior picture

Zero latency

Built-in control system

Voted Best System 3-years-in-a-row

The only true all-in-one system of its kind.

MHUB S outperforms AV-over-IP on the things that matter most - picture quality, latency and security - while giving complete venue control with lower cost of ownership and far simpler installs.

Plug & Play system

AV over IP (1G)

AV over IP (10G)

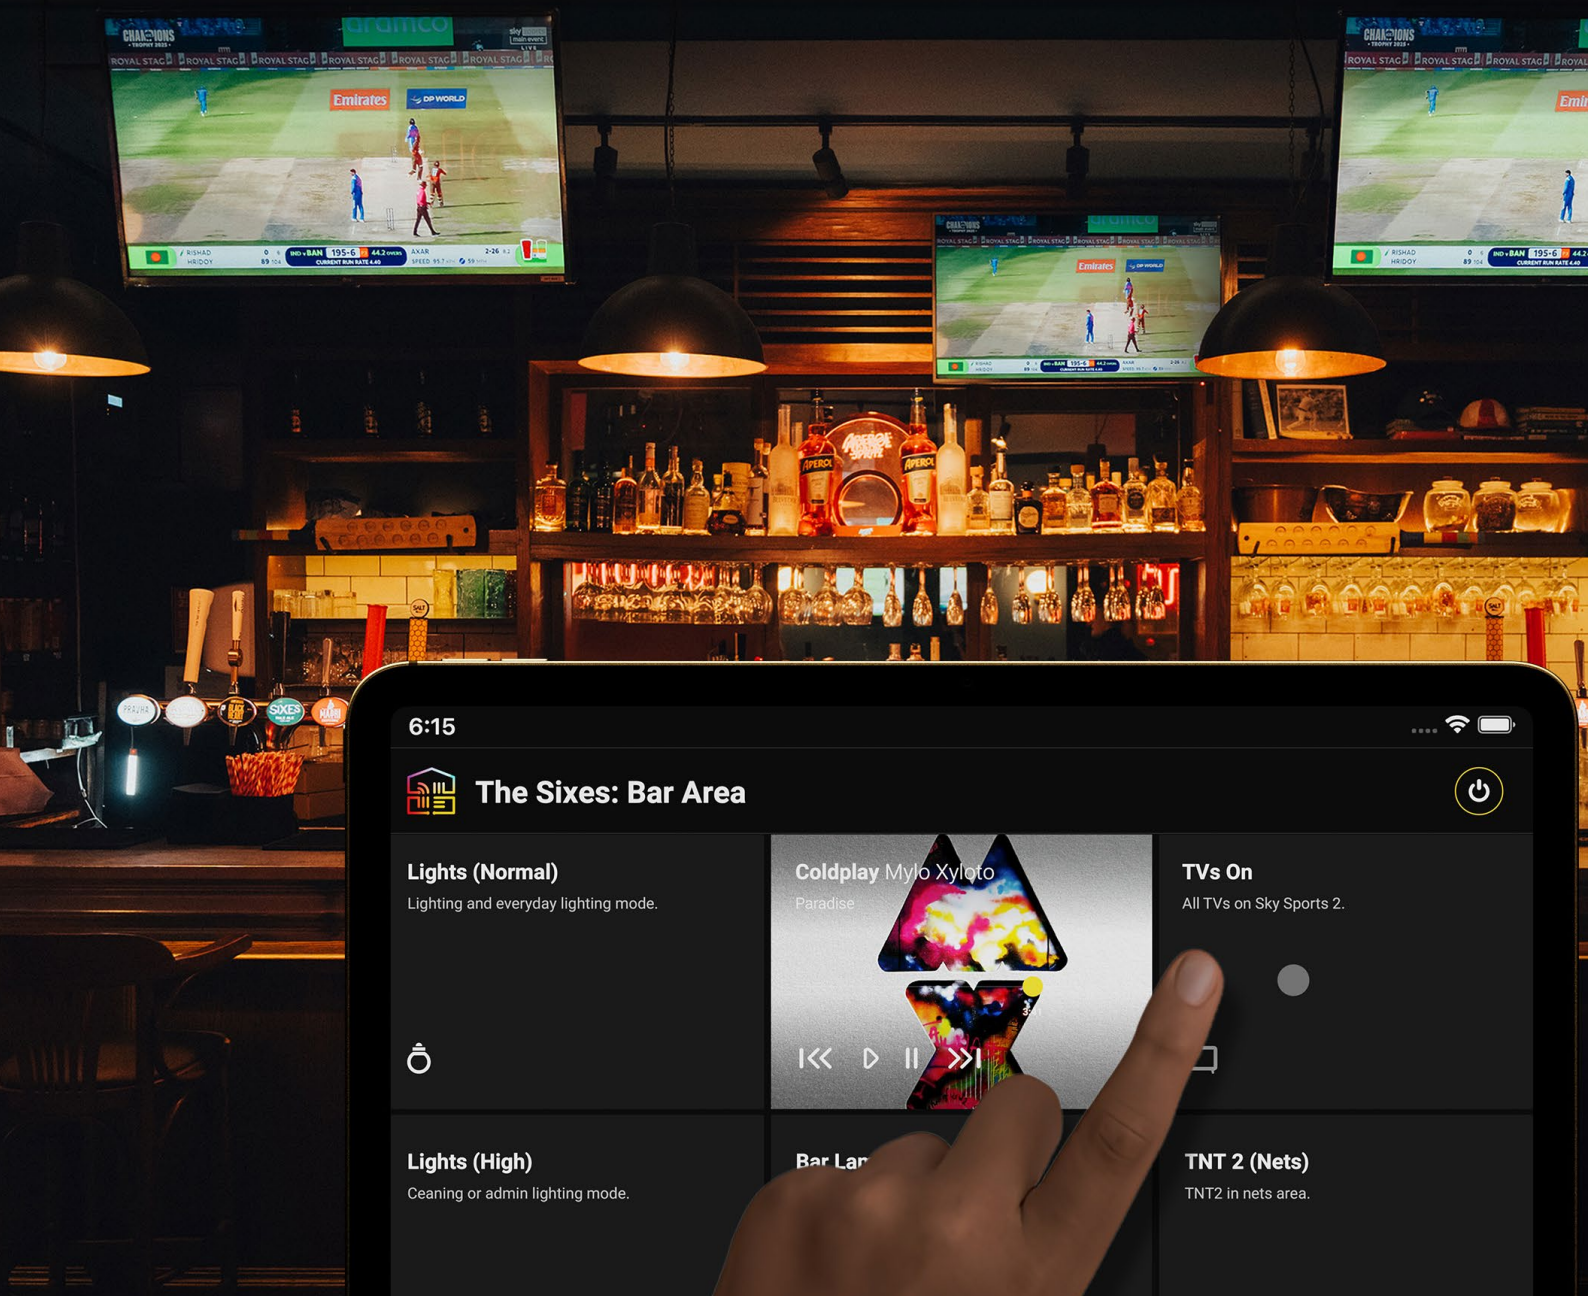

Setup		Requires networking knowledge / training
Inputs	Up to 16	Unlimited
Displays	Up to 160	Unlimited
Range over Cat 6	150m/492ft 100m/328ft (1080p / 4K)	100m / 328ft (1080p or 4K)
Video bandwidth	18 Gbps (Best visuals)	1 Gbps (Heavy compression) 10 Gbps (Lighter compression)
Latency	0.1ms (Zero latency)	Between 30-50ms (x300 slower)
System components	Everything included	Everything purchased separately
Control	Built-in control system (uControl inside)	Switching only
System security	Isolated transmission, closed system, secure-by-design	Reliant on IT security layer (Vulnerable to network attacks)
Cost of ownership	£ Everything included + easy setup	££ ££££ Skilled labour required to install, control system required 10G infrastructure (switch / Cat6a) + control system

A simpler way to do bigger AV projects.

MHUB S scales simply by stacking one unit with another, using nothing more than a standard HDMI cable between them. Each time you expand, you can add either 8 or 16 displays, providing flexibility to grow at the pace your project requires.

Built for business. Designed for ease.

Why overcomplicate control? uControl, built into MHUB S, gives you one universal platform to manage TVs, music, and more - faster to deploy, easier to use, and designed for real people.

Easy to use.

uControl makes managing AV as simple as using a remote or an app. Your team can control screens, audio, lighting, and more from behind the bar, the front desk, or as they walk the floor.

Automations & scheduling.

Create custom scenes like "Open Up", "Match Day", or "Closing Time" that instantly set TVs, lighting, and music to the right channels and volume with one button. Automate routines or schedule them to run exactly when you need.

Flexible control.

With the uControl App for on-the-go management, a single intuitive remote for all functions, or wall keypads for quick access to scenes and volume - all uControl interfaces are intuitive and staff-friendly.

Works with leading brands.

From bars to boats.

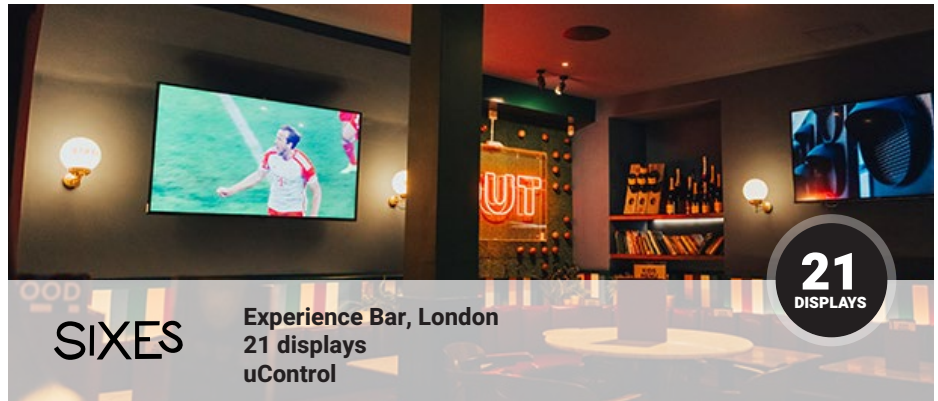

Installed all over the world. Create vibrant, tech-enabled environments that are easy to run and hard to forget.
