FL501T

This built-in speaker is flatter and more invisible than any of its predecessors. This T-version is fitted with a transformer, allowing different units into one circuit. The frame has been reduced to just one millimetre, yet continues to score highly in terms of vibration absorption. The grille of the speaker is extremely finetuned and feels almost like silk. The sound is accurate, warm and carries a long way. A no-bones-about-it speaker.

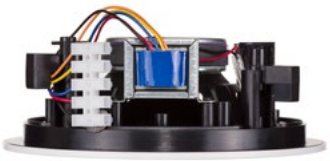

One of the most popular speakers with an all-purpose design, thanks to the power of the sound and the modest mounting dimensions.
