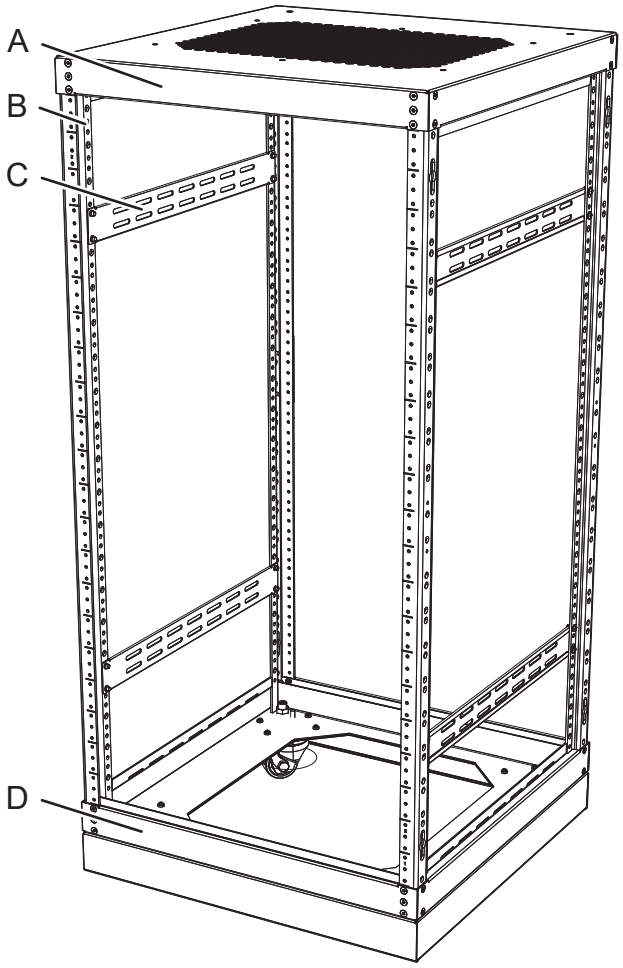
SR-CUSTOM Series
Floor Standing AV Rack System

Package Contents

A. 1x Top plate
B. 4x Rack pillars
C. 4x Side bars
D. 1x Base assembly
E. 4x Leveling feet (not shown)
F. Assembly hardware (not shown)
   - 40x Rack assembly screws
   - 16x Side bar screws
G. 3mm Hex driver bit

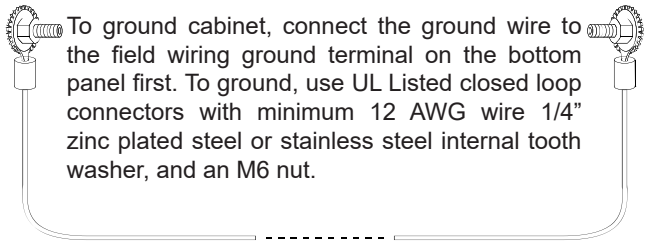


Key Features

- Easy assembly
- Counter-sunk assembly screws for clean appearance
- Locking pillars for extra stability and rigidity
- Concealed wheels
- Adjustable leveling feet
- Built in top ventilation mounting
- 1000 lb. maximum load
- Optional locking doors and side panels

Optional Accessories (sold separately)

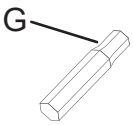
- Side Panels (SR-CUST-SP-XXU-XXIN)
- Window Door (SR-CUST-DOOR-XXU-GLS)
- Solid Door (SR-CUST-DOOR-XXU-SLD)
- Integrated Cooling (SR-FANBRACKET-2/4)



To ground cabinet, connect the ground wire to the field wiring ground terminal on the bottom panel first. To ground, use UL Listed closed loop connectors with minimum 12 AWG wire 1/4" zinc plated steel or stainless steel internal tooth washer, and an M6 nut.

Assembly Recommendations

- The included hex driver should only be used with torque-adjustable drills.
- It is recommended to hand tighten the assembly screws to final torque to avoid snapping screws.



CAUTION!
When loading equipment into cabinet, ensure that leveling feet are adjusted correctly and they come in contact with the supporting surface. Always load heavier equipment at the bottom of the rack with a minimum of 200 lbs into lower U spaces.

Equipment cabinets are intended to house or mount certified equipment that is provided with its own fire and electrical enclosure.

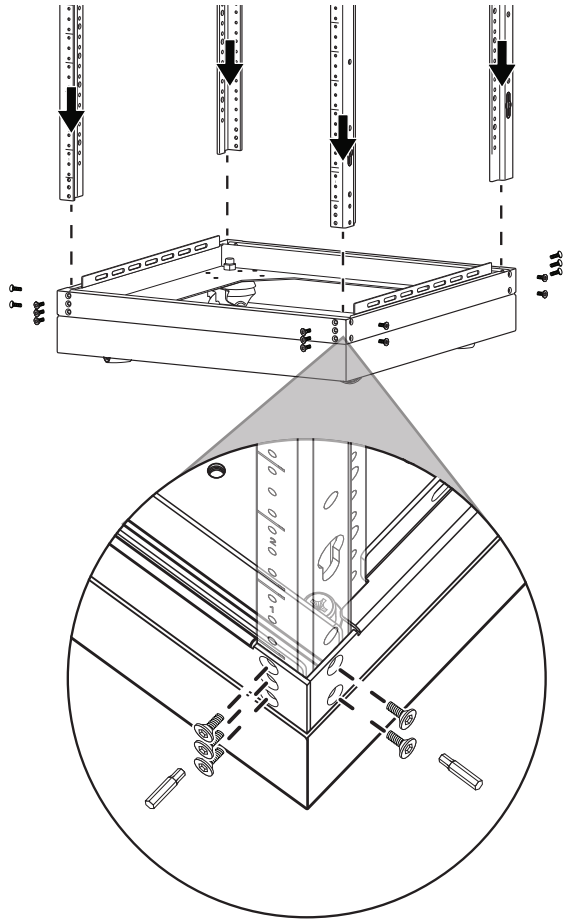
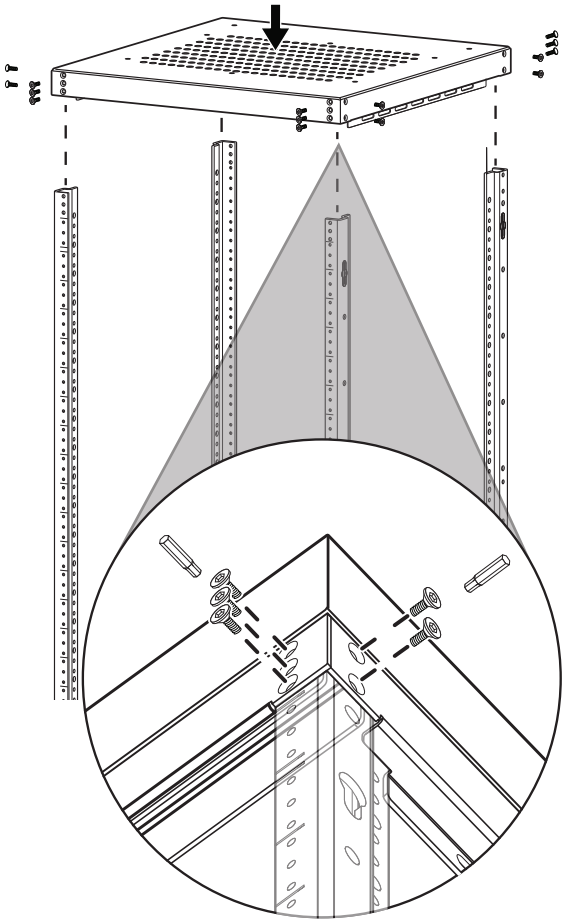
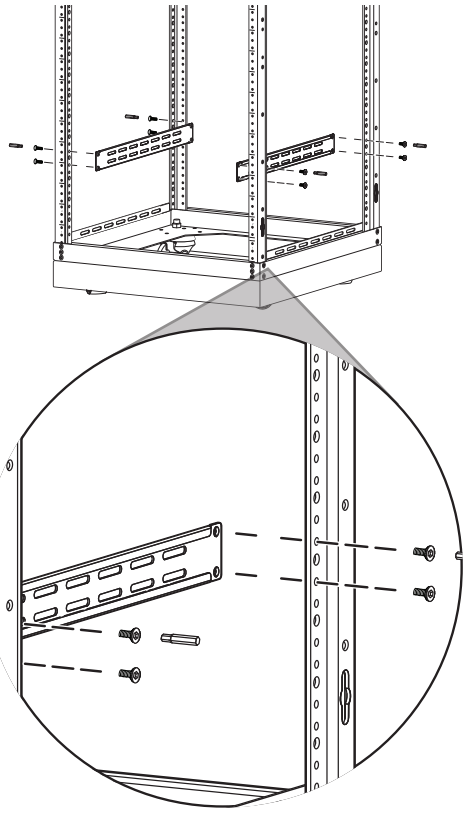
1 Attach the pillars to the base.



2 Attach the top to the pillars.

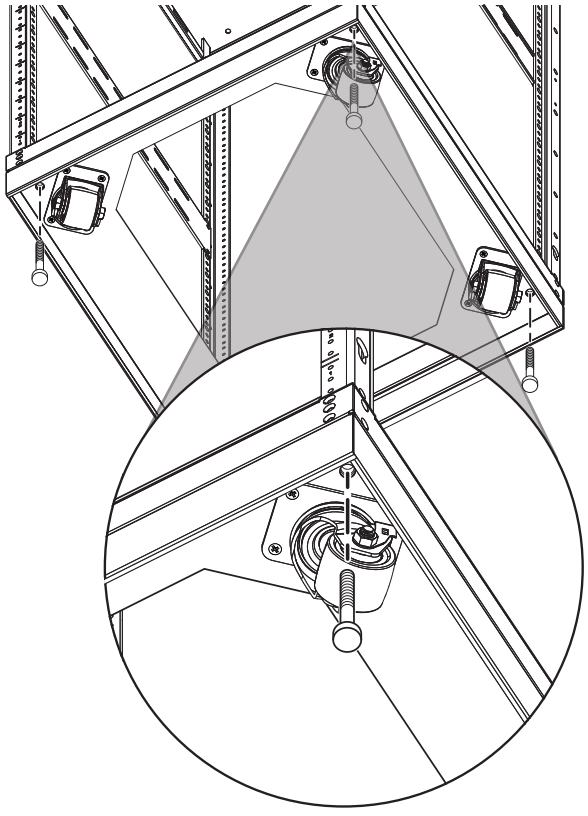


3 Attach the side bars.



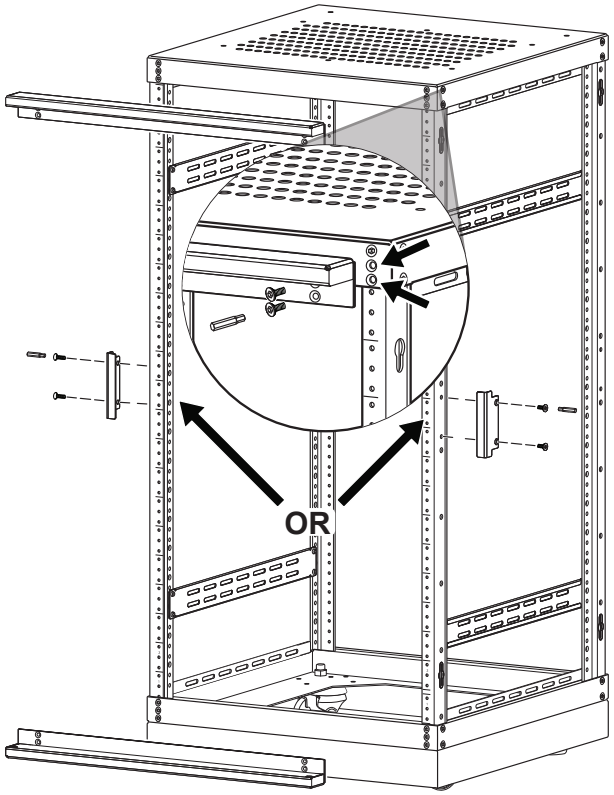
Note: The side bars are not required for structural support and can be mounted at any height. (Two of four included bars are pictured.)

4 Attach the leveling feet.

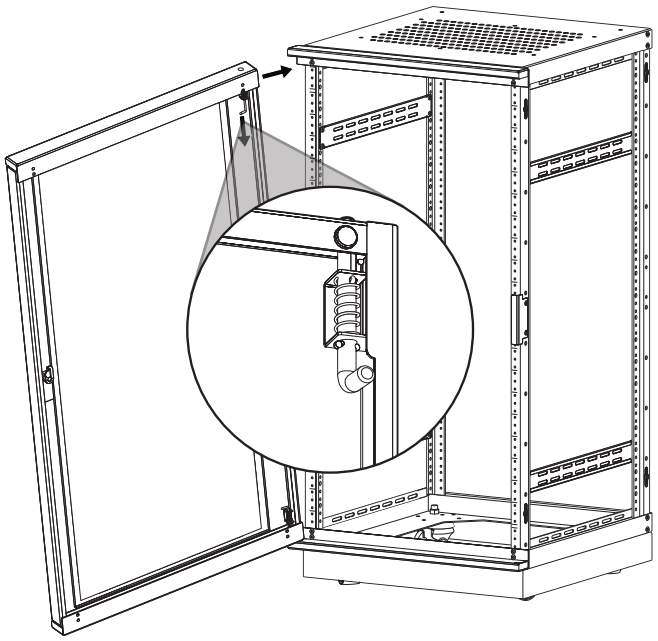


Note: Installing the leveling feet will restrict steering rotation of the casters. If the feet will be used, position the rack before installing equipment.

5 Optional: Install front and rear doors



Note: The door may be installed for left or right-hand swing. Hinge brackets are held on by 2 of the 3 assembly screws at each corner.



Note: Before installing the door, position the hinge bushings in the holes on the top and bottom brackets on the side that will swing.

6 Optional: Install the side panels.

Lifetime Limited Warranty

All Strong™ products have a Lifetime Limited Warranty. This warranty includes parts and labor repairs on all components found to be defective in material or workmanship under normal conditions of use. This warranty shall not apply to products that have been abused, modified, or disassembled. Products to be repaired under this warranty must be returned to Strong or a designated service center with prior notification and an assigned return authorization number (RA).
